

TECHJET

WATERJET CUTTING SYSTEMS

- **Complex Profiles Produced**

With a kerf width of less than 1mm almost any shape can be produced no matter how intricate.

- **Speed Of Cut**

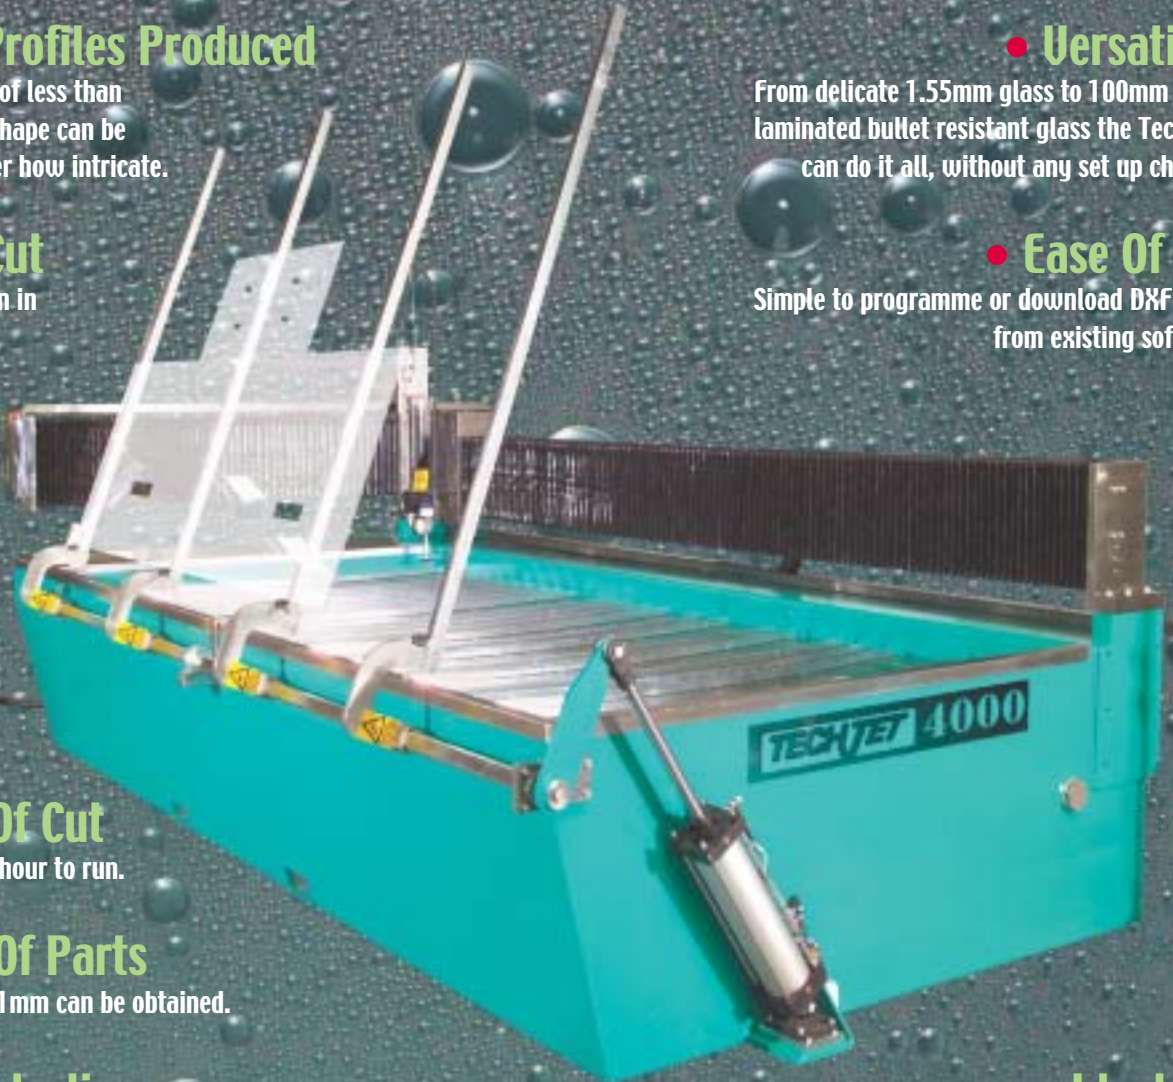

Up to 1000mm/min in 6mm glass.

- **Versatility**

From delicate 1.55mm glass to 100mm thick laminated bullet resistant glass the Techjet can do it all, without any set up changes.

- **Ease Of Use**

Simple to programme or download DXF files from existing software.

- **Economy Of Cut**

Very low cost per hour to run.

- **Accuracy Of Parts**

Tolerances of ± 0.1 mm can be obtained.

Made In Australia

The Techjet Waterjet Cutting Machines are designed and manufactured in Australia specifically for the Australian glass industry. Many of the features have been designed & developed with the assistance of local glass companies.

- **Ideal For**

Cutouts, notch's & holes in splashbacks, frameless showers & mirrors. All cut quickly with one set up on the same machine.
